Applicants respectfully submit that the complex energy operator as used in the independent claims should not be limited only to the description on page 16, because a person of ordinary skill in the art(s) pertaining to the claimed invention would understand that changes to the form of the complex energy operator presented on page 16 can be made without significantly affecting the results achieved therewith. For example, an approximation of the complex energy operator presented on page 16 can be formulated that is equivalent thereto.

Nevertheless, Applicants submit that all of the claims of the present application remain allowable over the prior art of record for the unique combination of features recited therein.

Applicants' undersigned attorney may be reached in our New York Office by telephone at (212) 218-2100. All correspondence should continue to be directed to our address listed below.

Respectfully submitted,
